# 10 March Templates: 2 Sizes

1. Shamrock
2. Rainbow
3. Basketball
4. Kite
5. Pot of gold
6. Butterfly
7. Flower
8. Ladybug
9. Cloud
10. Caterpillar

# Suggestions

## 4. Textured Rubbing Collage

### • Directions:

- Place textured objects (screen, leaf, sandpaper) under the template paper.
- Rub crayons over it to create a texture.
- Cut out the template (or have adults pre-cut).
- Mount on colored paper for a tactile art piece.

💡 *Skill:* Builds awareness of pressure and grip.

## 5. Crinkle and Glue Tissue Paper

### • Directions:

- Tear small squares of tissue paper.
- Students crumple each piece into a tiny ball.
- Dab glue inside template sections and press tissue balls down.

💡 *Tip:* This adds texture and repetition—great for students who like sensory feedback.

## 6. Yarn or String Tracing

### • Directions:

- Squeeze a line of glue along the outline of the image.
- Students place yarn or string pieces on the glue lines.
- Let dry, then feel the raised outline.

💡 *Skill:* Encourages visual-motor precision and finger isolation.

## 7. Pom-Pom Dabbing

### • Directions:

- Clip a pom-pom into a clothespin to make a “dabber.”
- Dip into paint and stamp inside a March template.
- Use color patterns or fill the entire shape.

💡 *Variation:* Use feathers or cotton balls for a different look.

## 8. Paper Punch Collage

### • Directions:

- Use paper punches.
- Students glue punched pieces inside a March template.
- Practice one-hand paper placement and finger isolation.

💡 *Skill:* Builds coordination and grip strength.

## 9. Feather or Fabric Decorating

### • Directions:

- Cut or pre-cut soft fabric or feathers.
- Glue them on the template.
- Discuss textures (“soft,” “tickly,” “smooth”).

💡 *Tip:* Great sensory engagement for students who like touch-based learning.

## 10. Sand or Salt Painting

### • Directions:

- Draw glue lines inside the template.
- Sprinkle colored sand or dyed salt over the glue.
- This is great for the pot of gold outline.
- Shake off excess onto a tray.

💡 *Skill:* Builds control when squeezing glue and improves hand stability.

## 11. Tear and Layer Silhouette Art

### • Directions:

- Students tear black construction paper to fill the *background* around the template to create a silhouette image.
- This is great for the cloud outline.
- Glue layers behind a cut-out template for contrast.

💡 *Tip:* Adds depth while keeping fine-motor demands manageable.

## Easy to find supplies

- White paper or cardstock
- Glue sticks and liquid glue
- Scissors
- Washable paint
- Paint trays or paper plates
- Pom-poms, or sponges for dabbing
- Tissue paper
- Construction paper
- Yarn or string
- Buttons, beads, or sequins
- Small stickers or color-coding dots
- Paper punches
- Feathers or fabric scraps
- Crayons and colored pencils
- Dot markers
